

**EduMonk**

Professional Cloud Developer Programme

A ten-page programme brochure for learners preparing for the Google Cloud Professional Cloud Developer pathway with guided labs, portfolio projects, learner stories, career support and EMI options.

**6 MONTHS****OFFLINE****5 LEARNERS****RS. 1L + GST**

A focused pathway. Built around official domains.

Prepare to build, secure, deploy and operate cloud-native applications with Google Cloud developer services. For developers and software-engineering learners who want stronger application-to-cloud delivery capability. The programme connects certification preparation with practical Google Cloud work and a clearer professional story.

Google does not administer this programme, internship or career support. Google independently governs its examination and certification award.

Six months. Five visible stages.

01

Foundation

Cloud foundations, role context and prerequisite skill refresh.

02

Core domains

Cloud applications, Testing, Deployment.

03

Applied labs

Guided Google Cloud labs connected to official exam expectations.

04

Projects and review

Portfolio evidence, technical explanations and case-study review.

05

Mock exams and profile

Gap analysis, mock exams, resume, LinkedIn and interview story.

Practice inside real cloud workflows.

01

Deploy a secure API to Cloud

Cloud Run · API Gateway

02

Build event-driven workflows

Pub/Sub · Eventarc · Workflows

03

Create a CI/CD release path

Cloud Build · Artifact Registry

04

Operate application telemetr

Logging · Monitoring · Error
Reporting

Show your judgement. Not only your notes.

Cloud Developer case study

Design and explain a professional cloud developer solution with architecture, implementation choices, review evidence and a clear limitations section.
